

HALITCAN ÇIKIKÇI

SOFTWARE ENGINEER

As a Senior Software Engineer and Tech Lead at Lemon Technologies, I specialize in software architecture, microservices, and end-to-end technical delivery across cloud infrastructures.

I lead and scale our engineering team to build reliable, high-performance, and production-oriented systems while prioritizing sustainability and best practices.

By collaborating closely with founders and stakeholders, I align technical solutions with business goals to foster a strong organizational culture and sustainable growth.

- English

EXPERIENCE

SENIOR SOFTWARE ENGINEER & TECH LEAD

Lemon Technologies

2020 - Present

- Architected the end-to-end system design and spearheaded the strategic migration to a microservices architecture.
- Defined the core technology stack and led the engineering team through all phases of project planning and management.
- Designed and optimized the cloud infrastructure to ensure scalable, high-performance production deployments.
- Collaborated with founders and stakeholders to align technical delivery with business objectives and sustainable growth.
